## VA Enterprise Capability Model (Business Reference Model), READ ONLY System Architect Thursday, April 21, 2016 9:01 AM Comment

The VAECM hierarchically depicts an integrated set of enterprise level capabilities and functions that the Department requires to fulfill mission objectives. It represents, at the enterprise level, the type of "work" the Department engages in to conduct its operations and business, including VA's services for Veterans and eligible beneficiaries, support functions, and resource management.
